Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This Office Action is responsive to the amendment filed 3/02/2004.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4-6, 12, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by GB 2,343,868 (Takata Corporation).

GB 2,343,868 discloses a cushion configured to inflate downwardly along a side surface of a vehicle (Figure 1) comprising: a cabin-side base fabric and a window-side base fabric (21, 22) sewn together along a seam (23); an outer shell fabric (11, 12) superposed on outer surfaces of the cabin-side base fabric and window-side base fabric; and wherein the outer shell fabric is bonded to the base fabrics at the seam by adhesive (20; see Figure 2). As seen in Figure 2, the base fabrics are sewn together along the periphery. The outer shell fabric comprises two separate pieces of fabric (11, 12). As seen in Figure 2, the seam does not pass through the layer of outer fabric. The shape of the fabric layer corresponds to the shape of the side sheets (the overall shape as seen in Figure 1)

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over GB 2,343,868 in view of EP 962363 (Mishina et al.).

GB 2,343,868 is discussed above and fails to show the base fabrics bonded together by adhesive along the seam.

EP 962363 discloses a side air bag comprising fabric sheets (1,2) sewn together along a seam (6A, 6B) wherein the seam is reinforced by an adhesive (5; see paragraph 15).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify GB 2,343,868 with the teachings of EP 962363 in order to reinforce the seam with adhesive in order to provide a stronger bond between the two fabrics.

Allowable Subject Matter

5. Claims 9-11 are allowed.
6. Claims 7, 8, 14, and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
